WOUND CARE LIQUID NITROGEN TREATMENT

- It is normal for the area to be red and possibly blister over the next few days.
- You can apply an over-the-counter antibiotic ointment, such as Bacitracin or Polysporin. Please do not use neosporin as it can cause an allergic reaction. It is not necessary, however, to cover it with a band-aid.
- There are no restrictions.

If you have any questions or problems, please feel free to contact our office at 973-571-2121 and ask to leave a message for a Nurse
