

Dermatology Group opens new office

The Dermatology Group has opened a full-service office in Riverdale at the junction of Route 287 and Route 23.

The Dermatology Group provides medical and surgical dermatologic care for a wide range of problems, including skin cancer, dermatitis, psoriasis, eczema and acne. The group also includes a Psoriasis Center and a Skincare Center that focuses on aesthetic care.

"With such unbelievable growth in our Verona office, we realized that another office was absolutely necessary to serve our patients in Riverdale/Wayne and the surrounding areas of Morris and Passaic Counties," said Dr. Daniel Groisser, founder and medical director.

The Dermatology Group includes five board-certified physicians and a team of licensed estheticians and skin-care specialists who help the doctors provide a broad range of services. In addition to being a board-certified dermatologist, each one of the physicians has a particular specialty. Dr. Groisser is a board-certified internist, specializing in psoriasis and eczema. Dr. Robert Nossa, who speaks fluent Spanish, is an expert in cosmetic procedures, especially the latest laser techniques. Pediatric dermatology, women's skin issues, and severe skin reactions such as Stevens Johnson Syndrome are the focus of Dr. Karen Gordon's work. Dr. Stephen Spates is recognized around the country for his expertise in skin cancer surgery, including the micrographic Mohs Surgery technique. The Dermatology Group's newest physician, Dr. Marc Abbate, focuses on bullous (blistering) and immune disorders.

The office is open from 6 a.m. to 7 p.m. most weekdays and on Saturdays. The office provides 24-hour on-call service.
