

Mohs Surgical Technologist (Certified)

We are currently seeking a Mohs Surgical Technologist (Certified) to travel with the doctor between three of our Northern Jersey based practice locations. We are looking for an experienced professional who can work quickly and efficiently in a fast-paced environment and provide our patients with the care and support they need prior to surgery. The Mohs Surgical Technician will work directly with the surgeon and the circulating registered nurse. The position's duties are highly variable, so the successful candidate must be willing to change direction at a moment's notice and keep pace with the other OR professionals on staff. There are positions available in our northern and central New Jersey offices. Please indicate which region you would be interested in when applying.

Responsibilities

- Secure and prepare all supplies required for surgical intervention
- Ensure the preparation and maintenance of the sterile field in OR
- Perform instrument counts prior to each procedure
- Prepare patient skin for surgical treatment
- Position and re-position patient during surgery
- Help monitor patients during surgery
- Provide supportive care during the pre-operative phase
- Perform scrub functions
- Collect and label specimens taken during surgical procedure
- Follow all federal, state and departmental safety procedures

Required Education, Skills, Experience and License / Certification:

- High School diploma or equivalent; some college preferred
- Certified Surgical Technologist (Certification an absolute must)
- 2+ years of experience as a Surgical Technologist with high professionalism, strong organizational, communication, analytical and PC skills with strong typing acumen required.
- At least one year of prior Mohs and or dermatologic surgery experience
- Must have knowledge of medical terminology
- Excellent grammar, spelling, and punctuation
- Exceptional customer service skills
- Friendly and compassionate disposition with strong interpersonal communication skills
- Excellent time management skills and ability to maintain effective and organized systems to ensure timely patient flow
- Ability to work independently or as part of a team
- Dedication to maintaining confidentiality of all patient records
